RECKITT BENCKISER N.V. et	al	

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY InterEXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: US-A-5362413 D2: WO-A-0183568 D3: WO-A-0140432 D4: WO-A-0111002

- 2. Novelty (Article 33(2) PCT)
- 2.1 The subject-matter of claims 1-9 appears to be novel.
- 3. Inventive Step (Article 33(3) PCT)
- 3.1 D1-D4 all disclose packaged detergent compositions from which the subject-matter of claim 1 differs in that an insoluble solid with a density lower than that of the liquid is present.

The aim of the present invention is therefore to provide a detergent composition packaged in a water-soluble container which provides earlier release of the solid components into the wash liquor.

D5 discloses non-aqueous liquid detergent compositions containing insoluble solids with a density lower than that of the liquid. However, the aim of the low density solid particles in D5 is to provide a more phase stable composition and no mention is made of packaging the compositions in water-soluble containers for direct addition to the wash liquor, nor is the low density nature of the solid particles described as enhancing the release of the solid material into the wash liquor.

It would therefore not be obvious to a person skilled in the art to combine the teachings of D5 with any one or more of D2-D4 in order to arrive at the solution provided by the present application.

3.2 Independent claims 8 and 9 relate to specific uses for these packaged detergent

EXAMINATION REPORT - SEPARATE SHEET

compositions and as such can be considered to be inventive as well.

3.3 The subject-matter of claims 1-9 is therefore inventive.
